## WARNING and SAFETY

*Before attempting any operation, please follow the safety instructions contained in the following paragraph.*

The producer declines any liability for damage to people or things due to non-compliance, even if partial, of the following indications:

- Check the integrity of the product after removing the packaging.
- Ensure that the supply voltage corresponds to what is indicated on the apparatus.
- Ensure that the electrical system is equipped with a ground connection.
- Use only power sockets and cables with ground connection.
- Disconnect power before attempting any operation inside the device.
- The power cutting device is the power cord, so this should be easily accessible and the socket must be positioned close to the apparatus.
- Any operation involving the access to internal parts must be performed only by trained technician.
- Use only accessories suggested by the producer.
- Don't use this apparatus near water.
- Don't use objects that contains liquids near the mixer.

*This Symbol means that there is High Voltage inside the apparatus, so pay attention from electric shock.*

## WARRANTY

The equipment is warranted for a period of 2 years from the date of invoice. The warranty does not cover faults provoked by carelessness, natural causes and parts subject to wear.

The warranty will be voided if the equipment is mishandled. We suggest to contact the DM Technical Assistance first.

## TECHNICAL SUPPORT

Our Technical service answer 24 hours on 24 every day, so don't esitate to contact us for any question or problem.

## FIRST AID PROCEDURES

All Personnel engaged in equipment installation, operation and maintenance must be familiar with First Aid Procedures and Routines.

### . Electric Shock Treatment

If the victim is UNCONSCIOUS:

- Lay the victim down on his/her back on a firm surface.
- Hold the neck and tilt the head backwards to free the airway system:

- If needed, open the victim's mouth and check for breathing.
- If there is no breathing, start artificial respiration without delay: tilt the head backwards, pinch the nostrils, seal your mouth around the victim's mouth and give 4 fast rescue breaths:

- Check for heartbeat; if there is no heartbeat, begin chest compressions immediately by placing your hands in the centre of the victim's chest:

- 1 Rescuer: give 2 quick rescue breaths after each 15 compressions.
- 2 Rescues: one rescue breath after each 5 compressions.
- Do not stop chest compressions while giving artificial breathing.
- Call for medical help as soon as possible.

---

If the victim is CONSCIOUS:

- Cover the victim with a blanket.
- Try to reassure the victim.
- Loosen the victim's clothing and have him/her lie down.
- Call for medical help as soon as possible.

## **. Treatment of Electric Burns**

Large Burns and Broken Skin:

- Cover affected area with a clean cloth or linen.
- Do not break any blisters that have formed; remove any clothing or fabric that is stuck to the skin; apply adequate ointment.
- Administer adequate treatment for the type of accident.
- Get the victim to a Hospital as quickly as possible.
- Elevate arms and legs if injured.

If medical help is not available within an hour, the victim is conscious and is not retching, administer a solution of table salt and baking soda (one teaspoon of table salt to half teaspoon of baking soda every 250ml of water).

Have the victim slowly drink half a glass of solution for 4 times during a period of 15 minutes.

Stop at the first sign of retching.

Do not administer alcoholic beverages.

Minor Burns:

- Apply cold (not ice cold) strips of gauze or dress wound with clean cloth.
- Do not break any blisters that have formed; remove any clothing or fabric that is stuck to the skin; apply adequate ointment.
- If needed, have the victim change into clean, dry clothing.
- Administer adequate treatment for the type of accident.
- Get the victim to a Hospital as quickly as possible.
- Elevate arms and legs if injured.

## ON

Channel ON/OFF Switch.

# TEL/LINE MODULE:

## INPUT SELECTOR

Switch to select the Line Input Source of the channel. (Hold for 1 second)

## GAIN

Adjust the Gain of the incoming signal level.

## SEND

Adjust the SEND signal level (signal sent to the caller).

## BAL

Adjust the level between the LEFT and the RIGHT channel of the input signal.

## PFL

Switch to activate the PFL on the input signal (Pre-Fader-Listen).

## FADER

Linear Fader controls the module overall level. It includes the rèle contact for external devices.

## LEDs

**48V:** Phantom Power Enabled/Disabled (ON/OFF) status of the Microphone Input.

**TEL/LINE:** Show the Line Input selected.

## HOOK

Switch to transfer the call on the internal telephone hybrid of the console.

## RECEIVE

Adjust the RECEIVE signal level (signal received from the caller).

## OUTPUT SELECTOR

Select the Output to enable between MASTER OUT and SUB OUT (or both). With LED status.

## ON

Channel ON/OFF Switch.

# MASTER SECTION:

## LCD DISPLAY

4" LCD Display to monitor the audio meters, the clock and the channel timer.
